

SANI-TIZER™

*Electric Portable Aerosol Applicator
 (ULV / Mister)*

Dispenses BOTH Oil and Water-based Products

The Sani-Tizer™ is specifically designed to spray anti-bacterial agents at a droplet size targeted to kill the living virus on surfaces before they spread to humans making it the first of its kind to be custom tailored for eradicating the live flu virus in large areas that are unpractical, if not impossible to wash or wipe down.

- Rugged design handles corrosive liquids and heavy impacts.
- Solid brass metering valve for delivering precise outputs and maximizing use of chemicals
- Low profile tank design virtually eliminates tipping...empty or full!
- Droplet sizes can be controlled for both ULV spraying and residual spraying.
